You are most like **The Implementer**

Implementers organize and structure people and processes to reliably execute tasks. They tend to be precise, reliable, results-oriented and more concrete and practical than philosophical.

Strategies and plans are only as good as the people working to achieve them. Implementers are the people who get important jobs and tasks done. Never getting too far ahead of themselves, they have the ability to focus on the task right in front of them.

Typical Implementers are distinguished by their organized and orderly approach to the jobs, assignments, and projects they work on. No detail is too small or unimportant to escape their notice and tracking. They follow through and complete what they start and work more comfortably when their priorities are set for them. They create, maintain, and embrace following the rules and structures put in place around them. Rules and procedures are essential to maintaining a stable and predictable environment. Implementers structure and plan their time to be efficient and productive.

Other distinguishing characteristics include making decisions using a methodical and systematic approach that yields consistent and expected results. They don't wait to get started on tasks, but take the bull by the horns and get moving on them. They don't act impulsively or take unnecessary risks. Finally, they tend to resent it when people act irresponsibly and unreliably.

They tend to be less drawn to generating new and innovative ideas, but pride themselves on finding the most efficient methods for getting things done. Some Implementers may have a difficult time saying no to requests for assistance, and they can be overwhelmed with too many things to do. Unexpected change and chaos creates stress for them. They tend to like to be appreciated and recognized for their contributions and become discouraged when their loyalty and hard work go unnoticed and unrewarded.

Implementer Talents

- Following through, getting things done on time and on schedule
- Focusing on the present and specific details
- Practical, dependable, and orderly
- Calming and reassuring force for team members
- Following procedures and rules and respecting the chain of command

Implementer Growth Needs

- Learning to say no and asking for support when overwhelmed
- Negotiating different responsibilities and priorities when necessary
- Being open to change and new ways of doing things
- Balancing short-term practical needs with future possibilities
- Accepting that change is inevitable and learning skills to manage it
- Not being too black and white in how they approach problems

You also have attributes of the **Technician** and the **Investigator**

The Technician

Technicians are driven to break down, analyze and solve problems in a methodical and practical way. They tend to be precise, efficient, systematic and pragmatic.

The Investigator

Investigators are driven to research and analyze information and data to build knowledge and understanding. They tend to be logical and analytical, rigorous, and more reserved and thoughtful than outgoing and expressive.

How You Prefer to Think

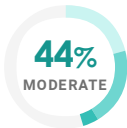

Creative

You tend to heavily favor tradition and set practices, and like following rules and routines.

- Original 14%
- Curious 18%
- Non-Conforming 11%

Deliberative

You tend to rely on logic yet are more spontaneous than methodical, and are inclined to trust your instincts when reaching decisions and making choices.

- Logical 77%
- Systematic 35%
- Impartial 19%

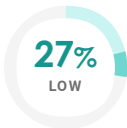

Detailed and Reliable

You tend to be organized and orderly, able to focus on details as necessary, with less concern about meeting strict deadlines and commitments.

- Organized 65%
- Detail-Oriented 47%
- Dependable 38%

Conceptual

You have a preference for straightforward, concrete thinking over abstract and philosophical thinking.

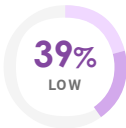

Practical

You have a preference to focus on direct, real-world consequences in making decisions and choices.

How You Engage with Others

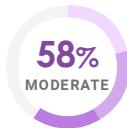

Extraverted

You tend to prefer less social activity and to engage in more intimate settings, though tend to be comfortable asserting yourself when in social situations and are moderately adventurous in the activities you like to participate in.

Gregarious	13%
Engaging	71%
Adventurous	44%

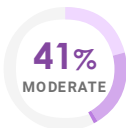

Tough

You tend to be willing to debate your and others' ideas and perspectives, share criticism openly when warranted, but tend to be more diplomatic and nuanced than blunt and direct in your style.

Feisty	70%
Critical	71%
Direct	32%

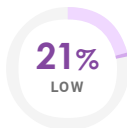

Nurturing

You have a strong desire to prioritize and support others' needs, while being less interested in deeply observing their personal behaviors, quirks, and tendencies.

Helpful	68%
Empathetic	40%
Person-Oriented	22%

Leadership

You tend to be less inclined to take charge in groups or rally others through inspiration and motivation, though are comfortable setting clear standards of performance and ensuring you and others meet them.

Taking Charge	13%
Inspiring	18%
Demanding	65%

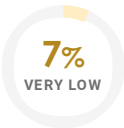

Humorous

You tend to be more joyful and lighthearted than serious and intense.

How You **Apply** Yourself

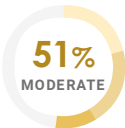

Composed

You tend to experience fluctuations in moods and emotions, and may lose composure or experience self-doubt, particularly in more stressful situations.

Calm	4%
Confident	25%
Poised	5%

Autonomous

You tend to be self-motivated, hold yourself accountable to the outcomes you experience, though have a desire for more direction and clarity when achieving tasks and goals.

Independent	20%
Self-Accountable	74%
Internally Motivated	60%

Flexible

You take some interest in your own personal growth and development, though you prefer environments with less change and uncertainty, and to be consistent in who you are and the roles you play regardless of the circumstances.

Adaptable	7%
Agile	36%
Growth-Seeking	59%

Determined

You may be less inclined to set ambitious rather than realistic goals, and prioritize pushing through to achieve them above all else.

Persistent	5%
Driven	19%
Proactive	37%

Humble

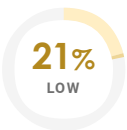

You tend to be less receptive to critical feedback, may prefer to project self-confidence rather than modesty, with a moderate inclination to seek out and explore perspectives different from your own.

Receptive to Criticism 22%

Open-Minded 47%

Modest 9%

Energetic

You tend to be quickly drained of energy and enthusiasm, needing to recharge after activity.

Status-Seeking

You have a preference to please, "keep up" appearances, be liked, admired, and respected.

How you respond in different situations:

Now that you've reviewed your detailed results, "You" in Context gives insight into how the combination of your attributes may play out in a variety of work and life situations

When interacting with others, you...

- ...Prefer to spend more time alone, and prefer not to stand out when engaging socially
- ...Tend to be fun, joyful, and lighthearted
- ...Try to strike a balance between supportiveness and direct feedback as necessary

As a leader, you...

- ...May more comfortably engage as a participant rather than take the lead yourself
- ...May prefer to follow directions from others rather than lead yourself
- ...Like clear expectations, routines, and procedures to anchor to
- ...Like clear direction from others, but don't always follow it when it conflicts with how you think things should be done
- ...Prefer to stay behind the scenes

When planning, you...

- ...Prefer stability, predictability, and following plans to counter change
- ...Are most comfortable when backup plans exist
- ...May establish less-focused milestones and objectives to plan against at times
- ...Think more concretely and literally

When solving problems, you...

- ...Like to stick to more traditional methods, and don't have much interest in engaging or debating unproven possibilities
- ...Seek some structure and clarity as you approach finding solutions
- ...Like to rely on established guidance and tested methods
- ...Rely on past experience as a guide
- ...Don't take unnecessary risks
- ...Generally take a structured and systematic approach

When setting goals, you...

- ...Tend to set more straightforward and concrete rather than far-reaching goals
- ...May tend to struggle if the path toward a goal is less clear and predictable

On a team, you...

- ...May be hesitant to share ideas until you've fully thought them through
- ...Are more comfortable working on your own, but help and support others when called upon
- ...Think that treating teammates well is as important as achieving goals

Under stress, you...

- ...Gravitate toward stability and predictability to keep you centered
- ...Can get more reactive and emotional in situations with more ambiguity and uncertainty
- ...May be resistant to taking advice from others
- ...Can get overwhelmed when the pressure and burden of responsibility on you is high
- ...May tend to retreat into your own head
- ...May be less expressive, so others may perceive you as calm, even if you are experiencing things strongly under the surface

When learning, you...

- ...Work things out in your own head rather than actively engage other people's perspectives
- ...Don't find open-ended brainstorming particularly productive
- ...Like subjects that are straightforward, technical, and practical
- ...Like to study in peace and quiet where you can focus
- ...Like to watch, read, and write
- ...Are interested in applying tested methods using concrete knowledge and skill
- ...Need mental breaks to recharge when you study
